DETAILED ACTION

Response to Amendment

The amendment filed 9/29/05 is objected to under 35 U.S.C. 132(a) because it introduces new matter into the disclosure. 35 U.S.C. 132(a) states that no amendment shall introduce new matter into the disclosure of the invention. The added material which is not supported by the original disclosure is as follows: a T-nut and a cruciform. A cruciform is defined as a cross or arranged as a cross. The original specification merely discloses an "X" or "Y" configuration. Clearly a "cruciform" is not an "X" or a "Y" configuration. As such the amendments to the specification have not been entered at this time. Applicant is required to cancel the new matter in the reply to this Office Action.

Withdrawal of Allowable Subject Matter

The indicated allowability of claims 76,78 and 95-98 is withdrawn in view of a more careful review of the reference(s) to DWILLIES. Rejections based on the newly cited reference(s) follow.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 78,98,100-142 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claims 78,98,100,102,118,120,123,125,134,136,140 and 142 include broad terms such as

"substantially" and "generally". It is not clear if something less than, equal to, or greater than is defined by the claimed language. Correction is required.

Claim Objections

Claims 100,123,134 and 140 are objected to because of the following informalities: the phrase "and the like" renders the claim(s) indefinite because the claim(s) include(s) elements not actually disclosed (those encompassed by "or the like"), thereby rendering the scope of the claim(s) unascertainable. Appropriate correction is required.

Claim Rejections - 35 USC § 102

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 76,78 and 95-98 are rejected under 35 U.S.C. 102(b) as being anticipated by US Patent #5,277,512 to DWILLIES. DWILLIES discloses the use of a post and beam furniture system for partitioning open including a plurality of overhead beams (10), each having opposite ends; a plurality of vertical posts (12), each having a lower portion thereof adapted to be abuttingly supported in a freestanding fashion on a floor surface of the open office space in a laterally spaced apart relationship, and an upper portion thereof operably connected with the opposite ends of said overhead beams (10) to support said beams (10) at a predetermined elevation above average user height; at least one of said posts having an X-shaped plan (see figure 14E) configuration defining four mutually perpendicular, outwardly extending flanges (F), each of which has an end face (EF) with a single T-shaped vertical slot (T) extending centrally therealong; at least

Art Unit: 3635

one of said posts (12) having a Y-shaped plan configuration (see figure 14D) defining three regularly spaced apart, outwardly extending flanges (F2), each of which has an end face (EF2) with a single T-shaped vertical slot (T2) extending centrally therealong (Column 8, lines 57-65); and a plurality of beam-to-post connectors (14,50) attached to the opposite ends of said beams, and detachably retained in said slot (T,T2) of aligned pairs of said flanges (F,F2) on said posts (12) to support said beams (10) on said posts (12) at said predetermined elevation. DWILLIES further includes at least one partition

accessory (91) having a mount (92) that is detachably retained in the slots (T,T2).

Regarding claim 78, as seen in figures 13 and 14A-E, the beams (10) includes opposite end faces (EF,EF2) having the T-slots (T,T2); wherein, each of the slots (T,T2) are generally similar in shape and size to receive the accessory (91) therein.

Claims 95-98 are rejected under 35 U.S.C. 102(b) as being anticipated by US Patent #5,277,512 to DWILLIES. DWILLIES discloses the use of a post and beam furniture system for partitioning open including a plurality of overhead beams/horizontal (10), each having opposite ends; a plurality of vertical posts (12), each having a lower portion thereof adapted to be abuttingly supported in a freestanding fashion on a floor surface of the open office space in a laterally spaced apart relationship, and an upper

portion thereof operably connected with the opposite ends of said overhead/horizontal beams (10) to support said beams (10) at a predetermined elevation above average user height; at least one of said posts (12) having a Y-shaped plan configuration (see figure 14D) defining three regularly spaced apart, outwardly extending flanges (F2), each of which has an end face (EF2) with a single T-shaped vertical slot (T2) extending centrally therealong (Column 8, lines 57-65); and At least two beam-to-post connectors (14,50) attached to the opposite ends of said beams, and detachably retained in said slot (T,T2) of aligned pairs of said flanges (F,F2) on said posts (12) to support said beams (10) on said posts (12) at said predetermined elevation. Regarding claim 96, DWILLIES further includes at least one partition accessory (91) having a mount (92)

that is detachably retained in the slots (T,T2). In reference to claim 97, the beams (10) each have an uppermost and lowermost face (EF) having horizontal T-slots (T) therein to receive key portions (68), see figure 5, of at least one of the beam-to-post connectors (14,50). Regarding claim 98, each beam (10) includes opposite end faces (EF) each with T-slots (T) that are similar in size and shape.

Allowable Subject Matter

Claims 30-34,79,82-87,89,94 are allowed.

Claim 99 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
